- Supports Healthy Brain Function*
- With Choline, A Nutrient Found in Breast Milk and Cauliflower

* Compared to Original Flintstones™ Complete Formula

Ages 5-6

By 5-6 years, most children can run well and will build their vocabulary to 2,500 words or more. Also, most children may be able to ride a small bicycle with training wheels (adult supervision is necessary). At this age, most children's appetites will vary day to day. When you give your children Flintstones™, you know they'll be getting key nutrients they need.

Supports a Healthy Immune System*

Age 4

By 4 years, most children have developed their vocabulary to about 1,500 words. Most children have developed complex motor skills and may be able to run with long, confident strides. Good nutrition is important for your child's healthy growth and development.

Flintstones™ is available in a variety of formulas and includes essential nutrients children may not be getting enough of every day.

Builds Strong, Healthy Bones and Teeth*

Ages 2-3

By 2 to 3 years, most children can demonstrate increased independence. Most children at this age can begin to walk fast as they explore their surroundings, and may even be able to ride a small tricycle.

As early as two, children may become more picky about the foods they eat.

My First Flintstones™ is specially formulated for children 2 and 3 years of age and provides 10 essential vitamins, including A, D, and C, important for your child's healthy growth and development.

Supports Health, Growth, and Development*
